

Intelligent automation – quiz - answers

1. Intelligent automation lies in the overlap of two big areas, being:
 - a. Deep learning and business process management
 - b. Artificial intelligence and neural networks
 - c. Artificial intelligence and robotic process automation**
 - d. Robotic process automation and business process management
2. The nervous system of any organization is:
 - a. Artificial intelligence
 - b. Business process**
 - c. Intelligent automation
 - d. Machine learning
3. Three main types of business processes are:
 - a. primary, core and tertiary
 - b. primary, secondary and tertiary
 - c. primary, supporting and management**
 - d. core, supporting and unframed
4. Knowledge-intensive business processes are tightly framed and application-to-application based.
 - a. True
 - b. False**
5. Robotic process automation is driven by simple rules and business logic.
 - a. True**
 - b. False
6. Who is considered to be the father of artificial intelligence?
 - a. Thomas Davenport
 - b. Michael Hammer
 - c. Alan Turing**
 - d. James Champy
7. What of the following is not a type of machine learning?
 - a. supervised learning
 - b. unsupervised learning
 - c. class-supervised learning**
 - d. reinforcement learning
8. Deep learning is derived from:
 - a. artificial neural networks**
 - b. k-nearest neighbour
 - c. correlation
 - d. new language processing
9. NLP in terms of artificial intelligence is the abbreviation for:
 - a. new language processing
 - b. natural language processing**
 - c. nice language processing
 - d. neural language processing
10. Intelligent automation is used with solutions that completely remove human work from process.
 - a. True**
 - b. False
